Red Titan

IFSI

RED TITAN produces roots that are very uniform in shape and feature consistent quality. This disease resistant variety can be used for pigment extraction, processing, topping or bunching.

Product Features

- Extremely Uniform Shape
- High Yield
- Consistent Quality
- Drought/Disease Tolerant

TRAITS	DESCRIPTION	DATA*
Color	Red	RD
Maturity (Days)		75
Shape	Top	Top
Internal Color	Dark Red	
Internal Zoning	None	
Sugar Content (%)	High	12-15%
Top Height (Inches)		12 inches-13 inches
Leaf Habit	Fully Erect	
Leaf Color	Green with Red Veins	
Bolting Tolerance	Resistant	Resistant

DISEASE & HERBICIDE REACTIONS

CLS = Cercospora Leaf Spot (Cercospora beticola), DM = Downy Mildew (Peronospora farinosa f. sp. betae), PM = Powdery Mildew (Erysiphebetae), RS = Rhizoctonia Root Rot (Rhizoctonia solani), and D = Drought.
